

INQUIRE

IQ³

PUBLIC SAFETY

The Next Generation in Investigations

THE PROBLEM

- ✓ 50% Of Investigator's Time Spent On Hand Written Notes
- ✓ 20% Error In Hand Written Notes
- ✓ Inaccurate Chain Of Custody Resulting In Decreased Accountability
- ✓ Unreliable Recall Due To Misinformation Effect
- ✓ Limited Availability of Interview Rooms

THE SOLUTION

- ✓ Remote, Secure Scene Witness Testimony & Inspections (CSI)
- ✓ Local Interviews Tied To Interview Room Camera
- ✓ IA Investigations And Disciplinary Interviews/ Actions
- ✓ Simple & Robust Data Storage And Management Software
- ✓ All Information Stored Securely & Easily Accessible In The Cloud

THE VALUE

- ✓ Expedites The Interview Process By Using Any Room Or Location
- ✓ Eliminates Note Taking Errors And Dramatically Reduces Misinformation Effect
- ✓ Assurance Of Seamless Chain Of Custody Packaging For Evidence
- ✓ Live Stream Anywhere With Two Way Chat/Audio
- ✓ Frees Up Investigator's Time By Decreasing The Time Spent On Paperwork

FEATURES

- Video Conferencing With Multiple Parties
- Recorded Events For Post Event Analysis, QA & Reports
- Text Chat, Notes, Bookmarks, Geo-Tagging
- Share Events With Other Investigators
- Privileged And Confidential Documents
- HTML5 And IET1 Compliant

INQUIRE

IQ³

INQUIRE IQ3 IS THE NEW GENERATION OF SOFTWARE FOR INTERVIEWS, INVESTIGATIONS, AND INSPECTIONS.

Inquire creates interviews, investigations, and incidents using an Android or IOS Application. It can also be used as a transcription device. Stream them live, record with bookmarks and notes, create audio and chat conferences, and automatically upload to the Inquire Server. Manage all of your interviews, meetings, investigations, and incidents in one location. Watch them live or later search on date, time, case ID, interviewer/investigator, interviewee, bookmarks, bookmark notes, GPS location, and device ID. In addition, perform QA evaluations and run reports.

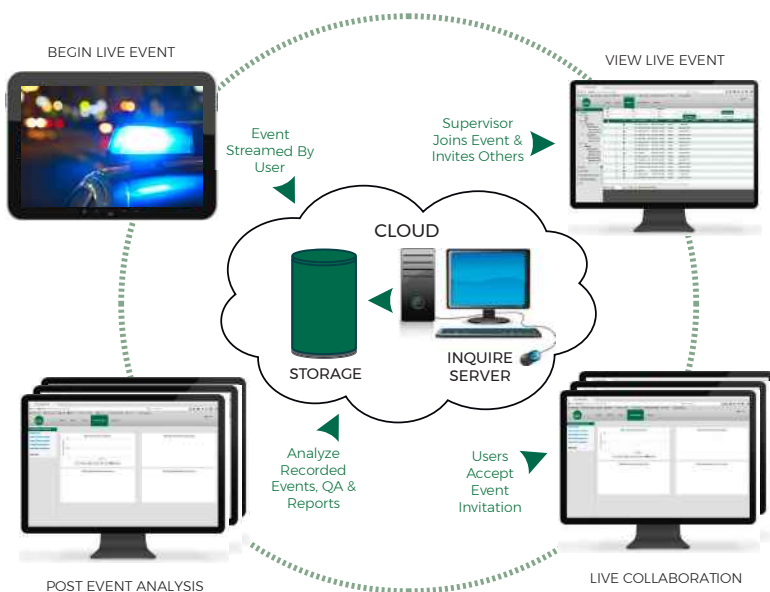

IQ3 can be used for your normal interview rooms at a much reduced cost. It can take advantage of existing infrastructure like IP cameras and take interviewing to the next level. In addition, remote interviews and investigations can be done. Detectives, investigators, police officers, and internal affair officers require detailed and precise data in order to log, maintain and present their cases. In most incidences, it's paper and pen or at best a digital hand-held recorder that documents the event. Writing down facts and answers to questions is far from 100% accurate. Study shows that there is a 20% error rate when comparing hand written notes with and voice recordings. Often times witnesses and suspects are asked to travel to another location in order to be questioned and many times it is hours or days after the event.

The Misinformation Effect.

A Northwestern Medicine study involving 17 people has shown that every time we remember an event that has happened from our past, our brain networks change in ways that actually alter the recall of the event.² This means the next time you remember it, you might not remember the original event but what you remembered the previous time. In addition to the above, there are other factors that can change or contaminate a person's memory of an event. Sometimes it's because of pressure, real or imagined, from outsiders, including relatives and friends of the witness.

IQ3 is integral in eliminating this misinformation effect and serving as a tool for interviewing, scene investigation, and collaboration.

Inquire IQ3 captures both audio and video at the scene of the event in real-time. Used in secure scene investigations, IQ3 enables simple recording, bookmarking, chat, and streaming from any location on an Android or IOS device via Wi-Fi or cell phone service (Based on service carrier). Events are stored and managed in a secure cloud environment for later viewing, reformatting and distribution. Activity and audit reports can also be run to ensure a true "Chain of Custody".

FEATURES

- » Simple Operation
- » Accurate Documentation
- » Automatic Download of Events
- » Quick Retrieval, Review, and Reformatting
- » Reduces Liability (He said-She said)
- » Solves the Misinformation Effect
- » Allows for Live Collaboration
- » GPS Location
- » Attaches Files/Graphics to the Record
- » Customize Bookmarks & Reports
- » Chain of Custody Assurance
- » Eliminates Note Taking
- » Reduces the Misinformation Effect
- » Increase Accuracy Of Information Collected
- » Decrease Time Spend on Paperwork
- » Review, Reformat and Distribute From Any PC
