Work Stations:

- Processor: 2 GHz or higher
- Operating system: Windows 7 (32 or 64 bit), Windows 8/8.1 (32 or 64 bit)
- Memory 4 GB of RAM
- 80 GB hard disk space
- CD-ROM or DVD-ROM drive
- T1, DSL, Cable or other high speed internet connection
- 19" Monitor: 1024 x 768 pixels or higher using small fonts
- 10/100/1000Mbps Ethernet Network Interface

Remote Desktop/Virtual Machines/Terminal Services:

The Revcord Software does work for remote desktop/terminal services and/or virtual machines. However these technologies must be supported at the site level by a knowledgeable IT staff.

What Is NOT Recommended:

- Windows Small Business Server (SBS) is not currently supported. Computers running Windows 95, Windows 98, Windows ME, Windows 2000, Windows NT, Windows Server 2003, Windows XP, Windows Vista
- Running on a machine with less than 1 GB of RAM
- Wireless networks
