REVCORD IQ3 IS THE NEW GENERATION OF SOFTWARE FOR INTERVIEWS, INVESTIGATIONS, AND INSPECTIONS.

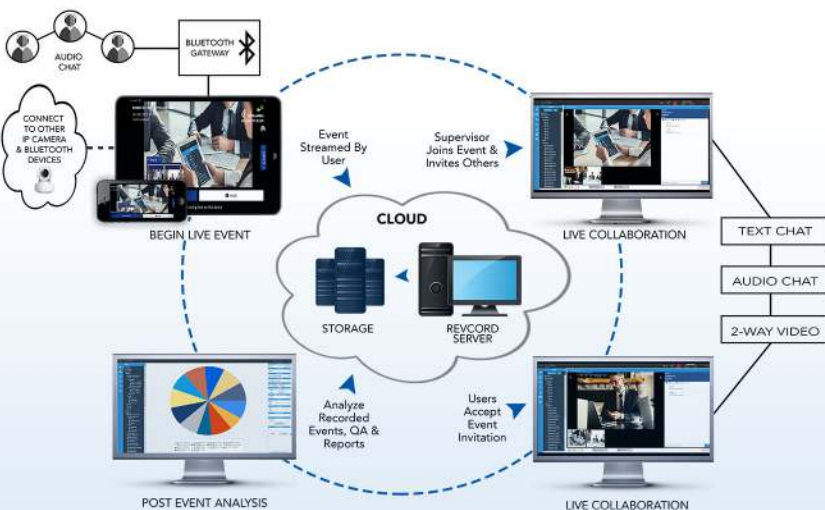

Revcord IQ3 creates interviews, investigations, and incidents using an Android or IOS Application. It can also be used as a transcription device. Stream them live, record with bookmarks and notes, create audio and chat conferences, and automatically upload to the Revcord Server. Manage all of your interviews, meetings, investigations, and incidents in one location. Watch them live or later search on date, time, case ID, interviewer/investigator, interviewee, bookmarks, bookmark notes, GPS location, and device ID. In addition, perform QA evaluations and run reports.

Every business has board meetings, corporate meetings, and interviews. And most struggle to get everyone scheduled to attend. Also, initial and exit interviews can be more than just questions on a survey. With video, customized bookmarks and questions, and live chat, interviews, as well as corporate and board meetings, can now be shared between departments and divisions with ease.

It is standard procedure in most workplaces to log everything of importance that transpires in a meeting. Methods of record-keeping may vary, but the most common method is having a secretary take notes. These notes, or minutes, are usually first circulated in draft form so that all participants have the opportunity to check for accuracy and to make corrections if necessary. This ensures that all participants agree that the record is accurate. Unfortunately, human memory is fallible. Using Revcord IQ3 to record the meetings, take notes, bookmark and share the recordings creates a failproof system for accurately documenting meetings.

On top of recording, Revcord IQ3 offers the ability for participants to end the scheduling hassle and attend the meetings or interviews no matter where they are located. Both audio and video can be set up wirelessly or just via a smartphone. Secure, accurate, and ready to go in seconds.

Revcord IQ3 captures both audio and video at any meeting or event in real-time. Used for any type of meeting or interview, IQ3 enables simple recording, bookmarking, chat, and streaming from any location on an Android or IOS device via Wi-Fi or cell phone service (Based on service carrier). Events are stored and managed in a secure cloud environment for later viewing, reformatting and distribution. Activity and audit reports can also be run to ensure quality of your events.

FEATURES

- Simple Operation
- Accurate Documentation- No More Note Taking
- Totally Secure In The Cloud
- Allows For Live Collaboration
- Attaches Files/Graphics To The Record
- Customize Bookmarks & Reports
- Retrieval By Any Authorized Participant From Anywhere.
- Increases Participation & Accuracy
- Observe Visual Characteristics
