SENIOR LIVING

COMMUNITY HEALTH PROGRAMS

THE PROBLEM

- ✓ Aging Population Living Independently; Increased Utilization on 911 & Acute Medical Care Resources.
- ✓ Constant Scheduling Conflicts with Case Workers & Families; Patient's Families Are Struggling to Manage a Loved One's Care.
- ✓ Physicians & Healthcare Workers Are Not Aware of the Patient's Real Issues Including Living Conditions.
- ✓ Unrecorded & Undocumented Interactions & Interventions of Medical Care; Case Workers with Heavy Case Loads Unable to Recall & Track Accurately.
- ✓ Lack of Sufficient Data & Performance Metrics to Demonstrate Positive Patient Outcomes for Key Stakeholders.

THE SOLUTION

- ✓ Live Streaming of Patient Care Meetings; Invite Multiple Parties to Collaborate with Medical Events for Better Treatment.
- ✓ Recording of All Meetings & Notes, Physicians See Firsthand What the Patient's Illness & Living Conditions Are.
- ✓ HIPAA Compliant Live Recorded Video with QA & Recording Analysis; Information Stored Securely in the Cloud.
- ✓ Accurate Documentation for Performance Management & Metrics.
- ✓ Complete On-Scene Management with the Ultimate Remote Triage Tool.

THE VALUE

- ✓ Significantly Reduce Dependence on 911 & Emergent Services by Remotely Connecting Patient & Field Workers with Care Teams & Physicians.
- ✓ Minimizing Scheduling Conflicts by Live-Streaming Collaboratively Between Care Teams, Family, & The Patient; Reduce & Save on Travel Expenses of Physicians & Specialists.
- ✓ Increase Patient Satisfaction & Health Equity by Reliable & Safe Virtual Meetings; Access into The Patient's Surroundings & Ease Family Concerns.
- ✓ Decrease Liability Issues by Having Documented & Recorded Patient Care Meetings; Central Depository for Records.
- ✓ Increase Patient Outcomes Through Performance Measurements & QA; Access to The Multimedia Management System & Secure Data Storage.

FEATURES

- Video Conferencing With Multiple Parties
- Text Chat, Notes, Bookmarks, Geo-Tagging
- Privileged And Confidential Documents
- Recorded Events For Post Event Analysis, QA & Reports
- Share Events With Other Investigators
- HTML5 And IE11 Compliant

REVCORD IQ3 MD IS THE NEW GENERATION OF ESCALATION, COLLABORATION, AND ASSESSMENT SOFTWARE FOR COMMUNITY BASED HEALTH PROGRAMS

Revcord IQ3 MD creates events through the cloud using an Android or IOS Application. It can be used as a transcription device. Stream them live, record with bookmarks and notes, create audio and chat conferences, and automatically upload to the Rvcord Multimedia Management System. Watch them live or later, search on date, time, patient ID, bookmarks, bookmark notes, GPS location, and device ID. Manage all events in one location and provide performance measurements for your department through QA, Data Analysis, and Reports.

Community Based Programs focus on improving the overall health of residents within its community. Collaborative teams include MIH-CP Fire/EMS departments, community care teams, physicians, and traditional healthcare systems. These care teams are addressing healthcare challenges of today such as an independent aging population, high utilizers of the 911 system for non-emergent & chronic illnesses, and an increase in hospital readmissions. Sustainability is increasing by support of public administrators, healthcare systems, and the Centers for Medicare & Medicaid Services (CMS) are including MIH-CP and the use of telemedicine in the ET3 and reimbursement models.

Introducing the IQ3 MD app is a simple and effective way for collaborative care teams to record and interact with primary care providers, specialists, healthcare professionals, and family's to improve a patient's access to care and helps reduce costs and overuse of the 911 system and ER departments.

IQ3 MD enables both audio and video of the patient in real-time. IQ3 MD enables simple recording, bookmarking, chat, and streaming from any location on an Android or IOS device via Wi-Fi or cell phone service (based on service carrier). Events are stored and managed in a secure cloud environment for later viewing, reformatting, and distribution. Activity and audit reports can be run to ensure a true "Chain of Custody."

Every Community Based Program and Collaborative Care Teams working within the framework of MIH-CP and a Healthcare System, needs a reliable and safe remote connection to Physicians, Healthcare Professionals, and the Patient's Family. A National MIH-CP Study conducted by the NAEMT stated that 95% of survey respondents agreed that their MIH-CP/Community Based Program is filling the gap in their local community. IQ3 MD offers a tool for Community Personnel that significantly reduces costs of the 911 system and increases patient access to care.

FEATURES

- Physician Has Direct Contact with The Patient
- Unlimited Viewers: Peer-To-All for Live Collaboration
- Ability to Transmit Vital Signs
- Hardware Agnostic
- IP Camera & Bluetooth Enabled
- Customizable Bookmarks, Notes, Private Text Messages (During Event)
- Fast Forward/Rewind – Live & Post Event
- Attached Files/Graphics to the Record
- Secure Cloud – Privileged & Confidential Document Storage
- GPS Location
- Preload Employees, Care Team Members, Physicians
- Livestream & Local Mode
- HIPAA Compliant
- HTML5 & IE11 Compliant
- Media Management System (MMS) – Data Analysis, QA, Reports
