

M.I.N.T.

MOBILE INNOVATIONS FOR NON TRANSPORT

THE PROBLEM

- ✓ EMS provides \$2.9 Billion of Uncompensated Care in the Pre-Hospital Environment Yearly; Leaving Agencies "Footing" the Bill.
- ✓ Default Destinations Limited to ER's for Chronic Conditions and Frequent-Callers; With Little Reimbursement & Taxing Strained Resources.
- ✓ 18% of All Transports are Non-Medically Necessary to Over-Crowded Hospitals; Negatively Increasing ER "Stay Time" to 3 Hours Per Visit.
- ✓ Increase in "Wall Time" for EMS Personnel in ER's Waiting for Beds for Non-Acute Patients; Negatively Impacting Resources Available for the Critically Injured Patients.

THE SOLUTION

- ✓ Remote connection to Physician to assist in medical triage and assess treatment plan.
- ✓ Provide alternative transport and destination options for optimal patient care.
- ✓ HIPAA Compliant Live & Recorded Video, Audio, Text Chat & More
- ✓ Complete On-Scene Management With The Ultimate Remote Triage Tool

THE VALUE

- ✓ Significantly Lower Agency Costs Associated From Non-Reimbursed Transports (Millions of Dollars Yearly)
- ✓ Minimize & Reduce ER Visits for Non-Acute Patients; Limit Overcrowding & Extended Patient Stay Times.
- ✓ Increase Resource Availability for Critically Injured & Sick Patients by Decreasing Non-Necessary Transports & ER "Wall Time."
- ✓ Positive Outcomes by Providing Care Where the Patient "Is" & Offering Alternate Transport Methods & Destinations.

FEATURES

- Video Conferencing With Multiple Parties
- Text Chat, Notes, Bookmarks, Geo-Tagging
- Privileged And Confidential Documents
- Recorded Events For Post Event Analysis, QA & Reports
- Share Events With Other Investigators
- HTML5 And IE11 Compliant

REVCORD IQ3 MD IS THE NEW GENERATION OF ESCALATION, COLLABORATION AND ANALYZATION SOFTWARE FOR HEALTHCARE PROVIDERS

Revcord IQ3 MD creates events through the cloud using an Android or IOS Application. It can also be used as a transcription device. Stream them live, record with bookmarks and notes, create audio and chat conferences, and automatically upload to the Revcord Server. Manage all of the events in one location for better QA, Training, and Reporting. Watch them live or later search on date, time, patient ID, bookmarks, bookmark notes, GPS location, and device ID. In addition, perform QA evaluations and run reports.

The EMS industry is facing not only an increase in overall 9-1-1 calls and for non-emergent complaints. Transports for non-medically necessary reasons are stretching limited resources thin. Sometimes referred to as "Frequent Flyers," those with chronic ailments do not have medical conditions that not only do not need transport to an ER; the treatment is one that does not carry a reimbursement. Each non-medically necessary transport costs EMS providers approximately \$1500 that they traditionally have to eat. How can these issues be solved?

Introducing a simple and effective way for Pre-Hospital Providers to interact with Medical Directors, Physicians, and Specialists ensure the best patient outcomes possible: M.I.N.T Mobile Innovations for Non-Transport).

Revcord's IQ3 MD captures both audio and video of the patient in real-time. IQ3 MD enables simple recordings, bookmarking, chat, and streaming from any location on an Android or IOS device via Wi-Fi or cell phone service (Based on service carrier). Events are stored and managed in a secure cloud environment for later viewing, reformatting, and distribution.

Activity and audit reports can also be run to ensure a true "Chain of Custody."

EMS Providers and Medical Directors are very concerned about patient outcomes. The system is overwhelmed with non-medically necessary transports, increased "wall time," and overcrowded ER's. Being able to treat patients from anywhere helps ambulances get back in service faster, thus reducing cost and improving workflow for EMS and Hospital Systems.

Every 9-1-1 ambulance service needs a program where an EMS Provider & the patient can log into the IQ3 MD App and connect with a Physician. 18% of 9-1-1 calls are from non-medically necessary transports, which results in no reimbursement. Revcord's IQ3 MD app offers a tool that significantly reduces costs associated with non-needed ambulances.

FEATURES

- Physician Has Direct Contact With The Patient
- Ability To Transmit Vital Signs To The Dr
- Simple Operation
- Accurate Documentation- No More Note Taking
- Totally Secure In The Cloud
- GPS Location
- Allows For Live Collaboration With Dr's & Specialists
- Attaches Files/Graphics To The Record
- Customize Bookmarks & Reports
- Quick Retrieval, Review And Reformatting
- Reduce Cost Associated With Transporting Frequent Flyers.
- Reduce ER Wait Times & Improve Outcomes for Medically Necessary Patients
