

SENIOR CARE

COMMUNITY HEALTH PROGRAMS

THE PROBLEM

- ✓ Delays in Patient's Treatment & Interventions Because of Distance Between Providers & Nursing/Transitional Care Teams
- ✓ Increased Demand & Dependence on 911 & ER's to Transport & Treat Patients for Low Acuity Interventions & Chronic Ailments
- ✓ Unable to Diagnose & Complete Treatment Plans Because Physicians & Specialist Don't Have "Eyes" on the Patient
- ✓ Challenges of Scheduling/Availability for In-Person Meetings Between Patient's, Their Family's, & The Care Team
- ✓ Unrecorded & Undocumented Interactions & Interventions of Medical Care; Nursing Teams with Heavy Patient Loads Unable to Recall & Track Accurately

THE SOLUTION

- ✓ Live Streaming Between Physicians & Onsite Patient Care Teams; Invite Healthcare Professionals to Assess Patients for Better Treatment
- ✓ Recording of All Meetings & Notes; Complete Picture of Patient Treatment Plan for Post Review
- ✓ HIPAA Compliant Live/Recorded Video with QA & Recording Analysis; Information Stored Securely in the Cloud
- ✓ Accurate Documentation for Performance Management & Metrics
- ✓ Complete On-Scene Management with the Ultimate Remote Triage Tool

THE VALUE

- ✓ Timely Assessment & Treatment Plans at the Patient's Bedside; Increase Patient's Access to Care in Real-Time
- ✓ Significantly Reduce Dependence on 911 & Emergent Services by Remotely Connecting Physicians & Nursing/Transitional Care Teams
- ✓ Increase Patient Satisfaction by Physicians & Healthcare Professionals Having "Eyes" On the Patient & Their Surroundings
- ✓ Minimize Scheduling Conflicts by Live-Streaming Collaboratively Between Care Teams, Physicians, & Family; Decrease Non-Necessary Patient Transports to ER's
- ✓ Increase Patient Outcomes; Access to The Multimedia Management System & Secure Data Storage for Real-Time & Post Review

FEATURES

- Video Conferencing With Multiple Parties
- Text Chat, Notes, Bookmarks, Geo-Tagging
- Privileged And Confidential Documents
- Recorded Events For Post Event Analysis, QA & Reports
- Share Events With Other Investigators
- HTML5 And IE11 Compliant

REVCORD IQ3 MD IS THE NEW GENERATION OF ESCALATION, COLLABORATION, AND ASSESSMENT SOFTWARE FOR COMMUNITY BASED HEALTH PROGRAMS

Revcord IQ3 MD creates events through the cloud using an Android or IOS Application. It can be used as a transcription device. Live-stream, record with bookmarks and notes, create audio and chat conferences, and automatically upload to the Rvcord Multimedia Management System. Watch them live or later, search on date, time, patient ID, bookmarks, notes, GPS location, and device ID. Manage all events in one location and provide performance measurements for your department through QA, Data Analysis, and Reports.

Community Based Programs focus on improving the overall health of residents within its community. Collaborative teams include MIH-CP programs, community care teams, physicians, and traditional healthcare systems. These care teams are addressing healthcare challenges of today's such as an aging population, high dependence on the 911 system and emergency departments, and delays of assessments and treatments for timely patient care. Sustainability is increasing by support of public administrators, healthcare systems, and the Centers for Medicare & Medicaid Services (CMS) are including MIH-CP and the use of telemedicine in the ET3 and reimbursement models.

Introducing the IQ3 MD app is a simple and effective way for collaborative care teams to record and interact with primary care providers, specialists, healthcare professionals, and family's to improve a patient's access to care and helps reduce costs and dependence on the 911 system and emergency departments.

IQ3 MD enables both audio and video of the patient in real-time. IQ3 MD enables simple recording, bookmarking, chat, and streaming from any location on an Android or IOS device via Wi-Fi or cell phone service (based on service carrier). Events are stored and managed in a secure cloud environment for later viewing, reformatting, and distribution. Activity and audit reports can be run to ensure a true "chain of custody."

Every Community Based Program and Collaborative Care Teams working within the framework of MIH-CP and a Healthcare System, needs a reliable and safe remote connection to Physicians, Healthcare Professionals and the Patient's family. Nursing and Transitional Care Facilities along with Community Based Teams have access to Physicians and Clinical Professionals to reduce delays in patient assessments and complete treatment plans at the patient's bedside rather than an emergency department. IQ3 MD offers a tool for Community Personnel and Nursing Teams that significantly reduces costs of the 911 system and increases patient's access to care.

FEATURES

- Physician Has Direct Contact with The Patient
- Unlimited Viewers: Peer-To-All for Live Collaboration
- Ability to Transmit Vital Signs
- Hardware Agnostic
- IP Camera & Bluetooth Enabled
- Customizable Bookmarks, Notes, Private Text Messages (During Event)
- Fast Forward/Rewind – Live & Post Event
- Attached Files/Graphics to the Record
- Secure Cloud – Privileged & Confidential Document Storage
- GPS Location
- Preload Employees, Care Team Members, Physicians
- Livestream & Local Mode
- HIPAA Compliant
- HTML5 & IE11 Compliant
- Media Management System (MMS) – Data Analysis, QA, Reports
