

REVSYNC

THE ULTIMATE BACKUP & REDUNDANCY FOR YOUR LOGGER

ACCESS YOUR BACKUP SYSTEM FROM ANYWHERE

WHY THIS IS THE RIGHT CHOICE!

Revcord estimates that the cost for an offsite storage will exceed more than \$1,000 per year for 1TB. That includes hardware, maintenance, support, retrieval, storage allocation, and other intangibles. With onsite storage, one catastrophe, and you can lose all your data.

Too much money is spent each year driving to the office to retrieve audio and video for a court case, subpoena, warrant, or other requirement. It could cost more than \$600 per year, for each of your personnel, in traveling expenses and take hours of your time waiting for the data to download from the logger.

KEY FEATURES
